# Attribute Mapping

## What is Attribute Mapping?

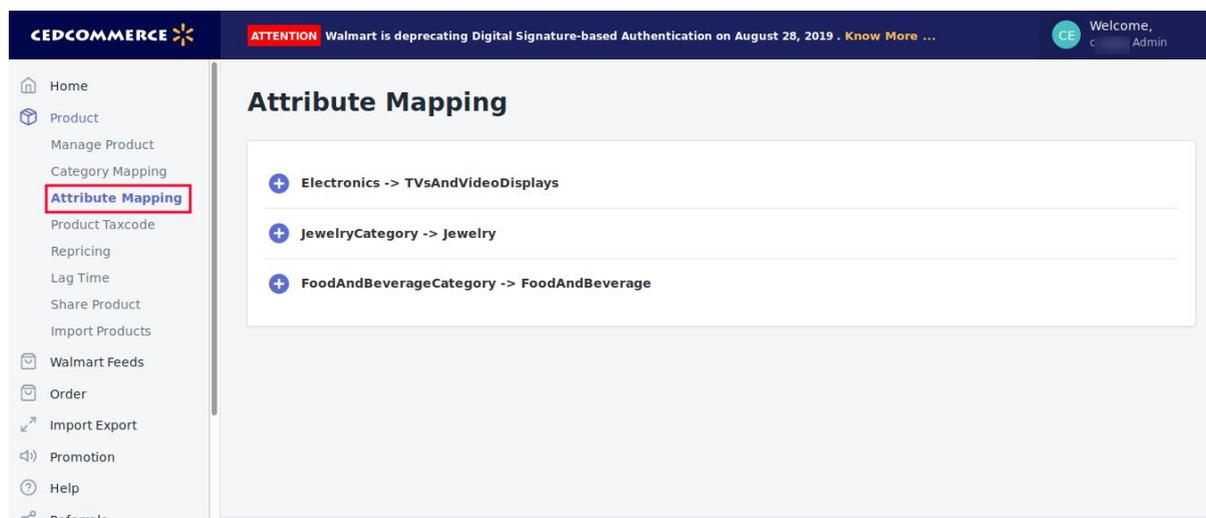

Attribute Mapping is the process of mapping the Shopify attributes like color, size or style with the Walmart attribute. Attribute Mapping is mandatory in case of variation products but sometimes attribute mapping is required for simple products also when you had products for specific size and color.

Attribute Mapping can be done in two ways, either mapping the attributes of all the products at one time or mapping the attributes of the individual product by editing them.

## How to do Attribute Mapping?

### Attribute mapping in bulk

- Go to **Products**.
- Then **Attribute Mapping**.

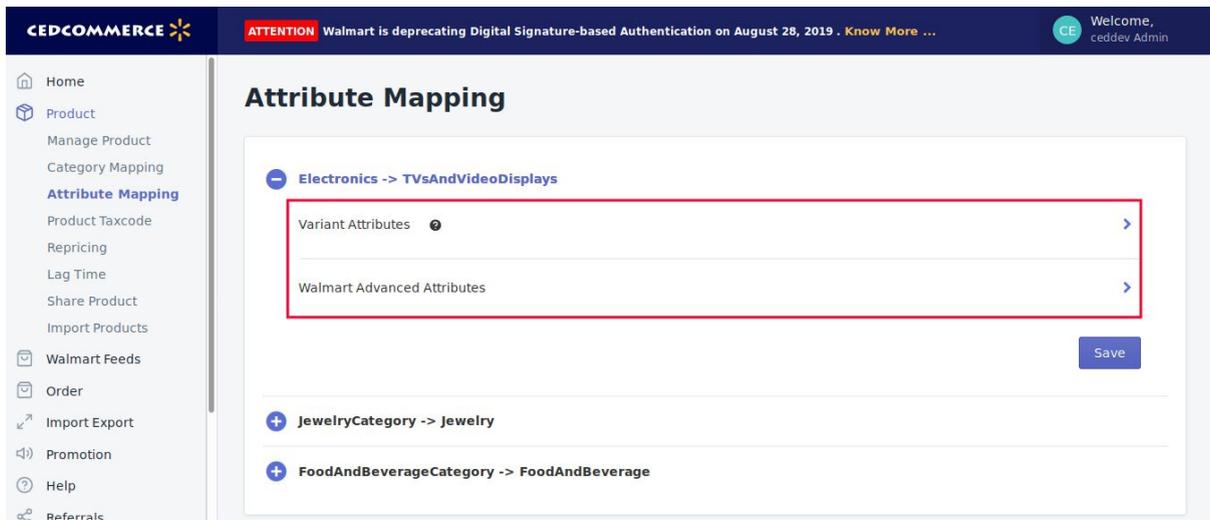

The screenshot shows the CedCommerce Admin interface. The top navigation bar includes the CedCommerce logo, an attention banner about Walmart deprecating Digital Signature-based Authentication on August 28, 2019, and a user profile for 'Admin'. The left sidebar contains a menu with options like Home, Product, Manage Product, Category Mapping, Attribute Mapping (highlighted with a red box), Product Taxcode, Repricing, Lag Time, Share Product, Import Products, Walmart Feeds, Order, Import Export, Promotion, Help, and Referrals. The main content area is titled 'Attribute Mapping' and displays a list of mappings:

- Electronics -> TVsAndVideoDisplays
- JewelryCategory -> Jewelry
- FoodAndBeverageCategory -> FoodAndBeverage

- You will find the **Walmart Main Category** and **Sub Category** that you have chosen for your products.
- Click on the Walmart Category (here, **Electronics -> TVsAndVideoDisplays**)

- You will find 2 options,
  - **Variant Attributes** and
  - **Walmart Advanced Attributes.**

**Variant Attributes:** Allows you to map your Shopify Variant Options with Walmart Attributes which helps you to list your as variants on walmart.com

**Walmart Advanced Attributes:** Allows you to add the additional advanced attributes to your products which helps in improving the listing and ranking of your products. Such as keywords, key features, gender, age group, etc.

- Now click on **Variant Attributes** and you will find the list of **Walmart Variant** options associated with the selected Walmart category and corresponding to it, the list Shopify Options are listed.
- Select the right Walmart attribute for your Shopify Options. **Example,** color to be mapped with color.

**CEDCOMMERCE** ATTENTION Walmart is deprecating Digital Signature-based Authentication on August 28, 2019 . [Know More ...](#) Welcome, Admin

**Attribute Mapping**

Electronics -> TVsAndVideoDisplays

Variant Attributes

WALMART	SHOPIFY
color Variant	<input type="checkbox"/> Size <input type="checkbox"/> Age <input type="checkbox"/> Title <input type="checkbox"/> Ships From <input type="checkbox"/> OS <input type="checkbox"/> Shoe Size <input type="checkbox"/> Diameter <input checked="" type="checkbox"/> Color <input type="checkbox"/> Quantity <input type="checkbox"/> Material <input type="checkbox"/> test <input type="checkbox"/> Sizes <input type="checkbox"/> Neck Size <input type="checkbox"/> count <input type="checkbox"/> 2oz <input type="checkbox"/> Shoe US Size <input checked="" type="checkbox"/> color <input checked="" type="checkbox"/> Colour <input type="checkbox"/> Wedding Title

Select the appropriate shopify options for **color** attribute from the above list of shopify options.

- Once done, move on to the Walmart Advanced Attributes.
  - You have two options here,
    - Map the Walmart Attribute with Shopify Option (field) or
    - Add custom value to the Walmart Attributes.
- Example:** You can map the Keywords (Walmart Advanced attribute) with Tags of Shopify Option.
