# Category Mapping to Walmart Categories

Whenever you will add a new product to your Shopify store with new **Product Type** then, in that case, it is necessary to map the **Product Type** with the **Walmart Category**.

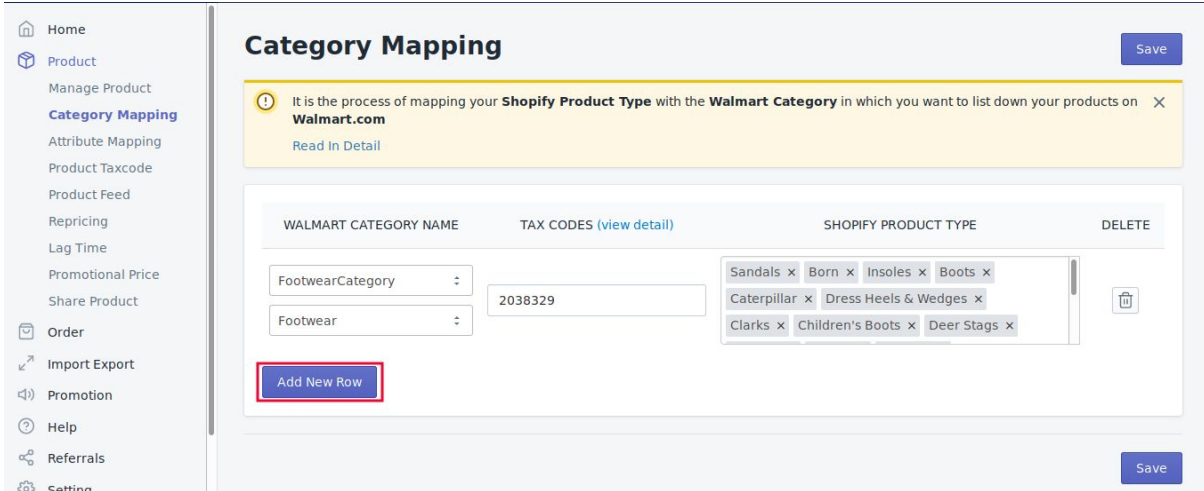

### **Why is Category Mapping Done?**

Category Mapping is the process of mapping your Shopify Product Type with the Walmart Category in which you want to list down your products on walmart.com. The Category with which you will map your products type your product will be listed under that category.

**For example,** If you are selling Clothing type Products then you will select “**Clothing Category**” as Walmart main category and “**Clothing**” as the sub-category.

To do the Category Mapping follow the given steps:

- As you can see "**Add New Row**" button on the screen. Click "**Add New Row**" button to add the Walmart categories.

The screenshot displays the 'Category Mapping' interface. On the left is a sidebar with navigation links: Home, Product, Manage Product, Category Mapping (highlighted), Attribute Mapping, Product Taxcode, Product Feed, Repricing, Lag Time, Promotional Price, Share Product, Order, Import Export, Promotion, Help, Referrals, and Setting. The main content area is titled 'Category Mapping' and includes a 'Save' button in the top right. A yellow informational banner at the top explains the mapping process. Below this is a table with the following structure:

WALMART CATEGORY NAME	TAX CODES (view detail)	SHOPIFY PRODUCT TYPE	DELETE
FootwearCategory	2038329	Sandals x Born x Insoles x Boots x Caterpillar x Dress Heels & Wedges x Clarks x Children's Boots x Deer Stags x	

A red box highlights the 'Add New Row' button located below the table. A 'Save' button is also present in the bottom right corner of the main content area.

- As soon as you click on the button you will be able to see the following:

It is the process of mapping your **Shopify Product Type** with the **Walmart Category** in which you want to list down your products on **Walmart.com** ✕
