

Export/ Import

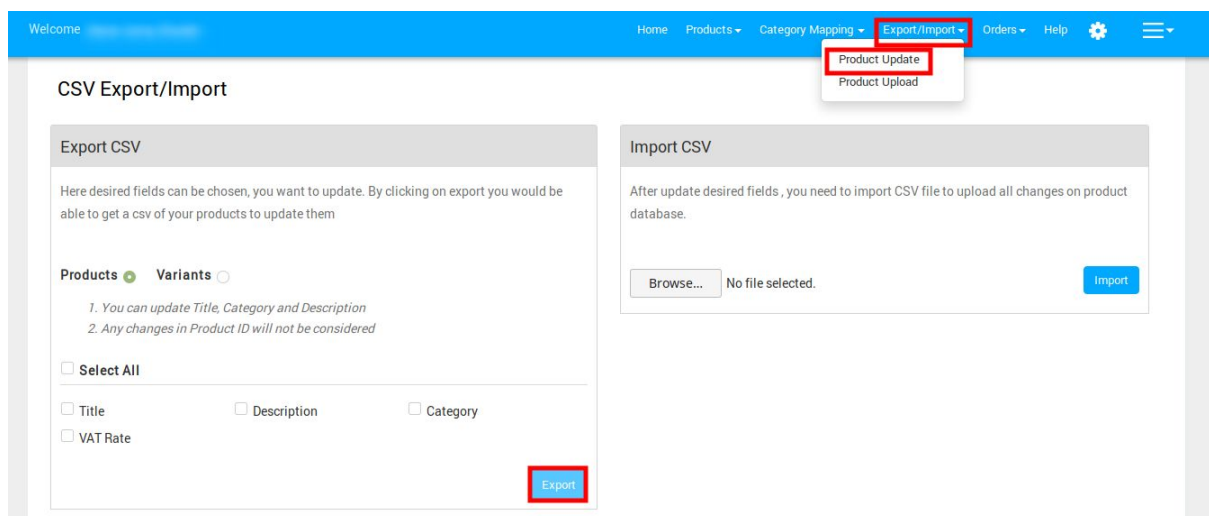

Through Export/ Import section you can update the product information and upload the products also.

Product update:- If you want to edit or update the product information from the app like titles, description, price, barcodes, VAT rate, inventory, weight, categories etc. you can do this from this section.

Steps for update the changes from the app:-

- 1.) Go to Export/Import section of the app.
- 2.) Click on “Product Update”.
- 3.) Select the field which you want to update.
- 4.) Export the CSV file, and update the changes.
- 5.) Save that file and then “Import” it again in the app.

NOTE:- If you want to update the changes in the feed, you have to upload the products.

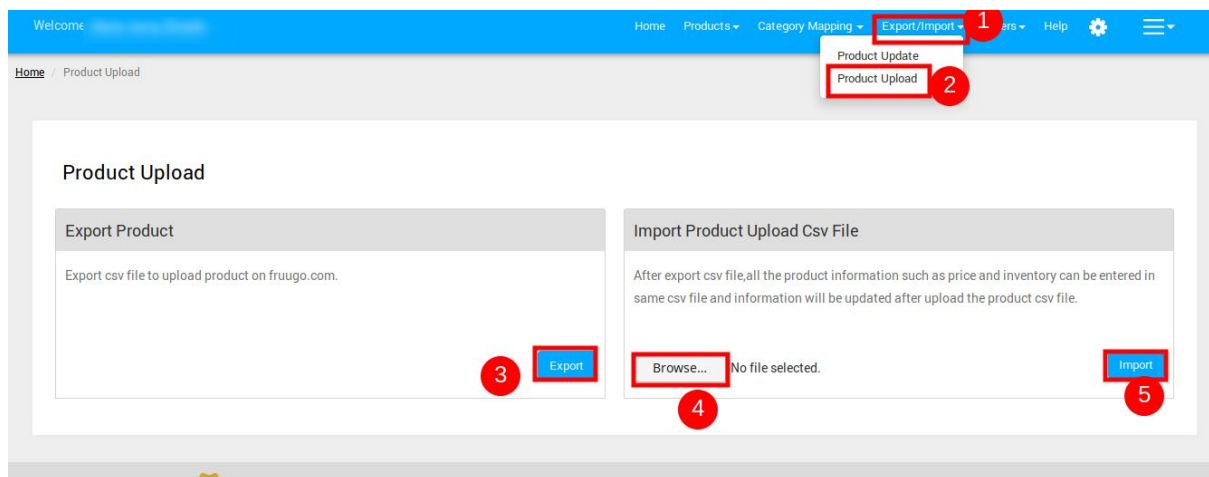

Product Upload:-

If you want to upload the existing products in bulk, you can do this section just add your sku's and upload the products.

Steps of uploading products in bulk: -

- 1.) Go to Export/Import section of the app.
- 2.) Click on “Product Upload”.
- 3.) Export the CSV.
- 4.) Put the SKU’s on that sheet and save it.
- 5.) Import that CSV into the app.

Hope you find the content helpful.

Thanks!!
