

Configuration Setting

1.) Product static URL

From setting section you can find your product feed URL and copy it.

Product Feed URL	
You have to share this Feed url with fruugo,so that they can access product csv for your account.	https://apps.cedcommerce.com/marketplace-integration/var/fruugo/product_upload_csv/43df125864b5a7074f0333503e1b54df/MerchantSKU.csv 

2.) Order Settings:-

2.1) Fruugo order:- If you don't want to manage the orders form the app, then you can off the Order Management from the app.

2.2) If you want to ship Fruugo orders without tracking details, you can set from here.

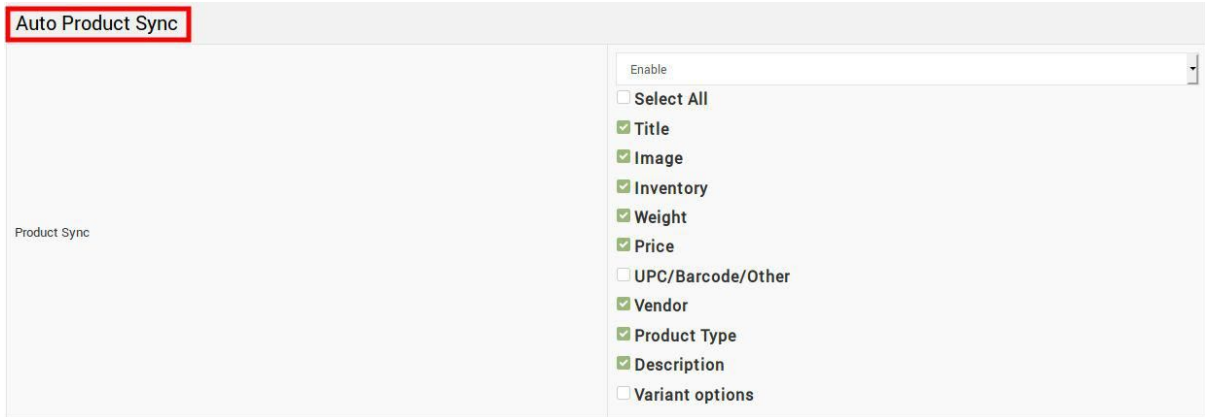

2.3) Inventory Option:- If you want to allow overselling to your products, means buyer always buy the products when "Out-of-stock" then you can also allow "Shopify don't track" inventory from the app.

2.4) If you don't want to get notified about your new orders, then you can off the setting from here.

2.4) Track order Information:- If you don't want to track your order's information via email, then you can off this from the app.

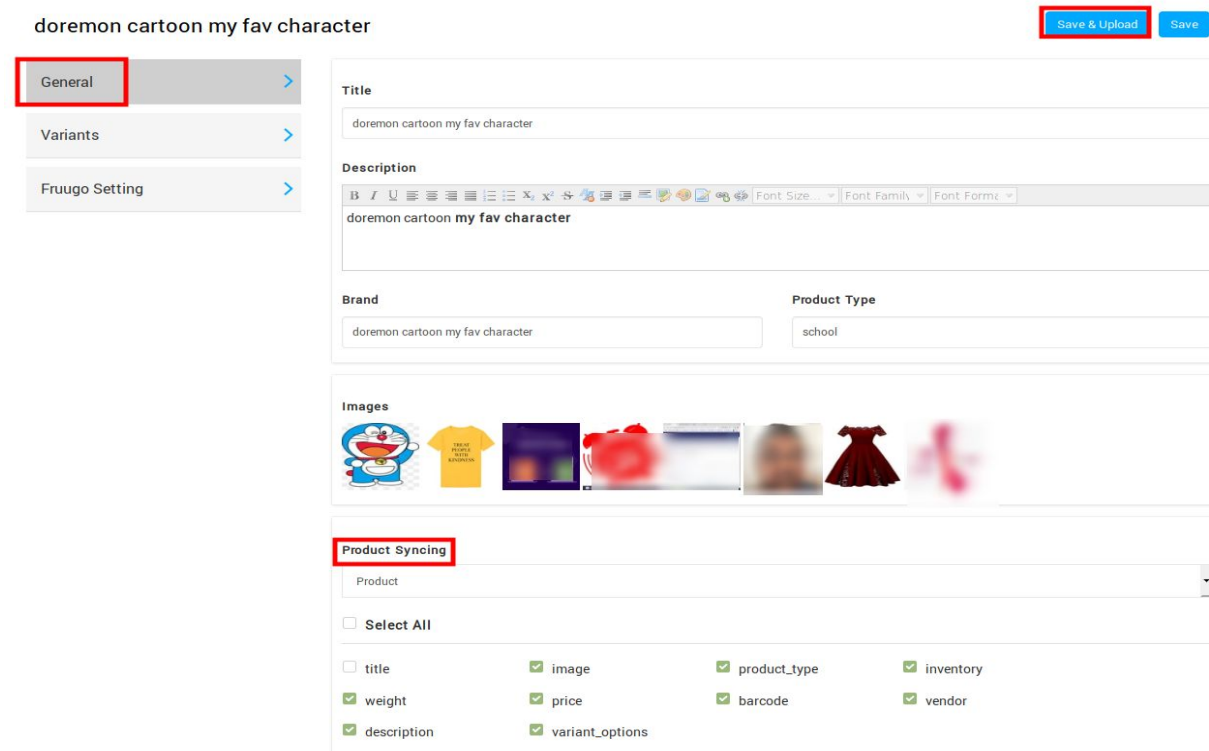

Want to have a track of your Fruugo orders?	<input type="checkbox"/> Yes
---	------------------------------

4.) Auto product sync:- If you want to update the product information automatically from Shopify to app, then allow these settings.

4.1) You can also set “Auto product syncing” for a particular product from the “Manage Product” section of the app. If you don’t want to sync anything from Shopify to app for a particular product, then follow these steps:-

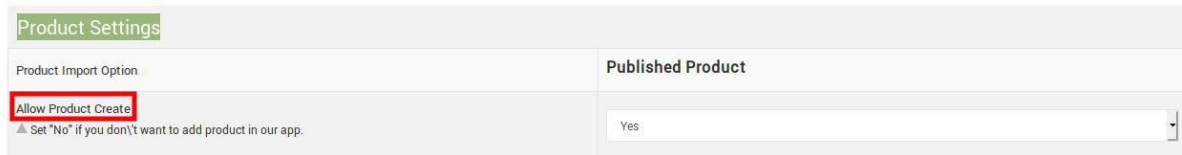

- Go to Manage Product section of the app.
- Select the product which you don’t want to sync from Shopify.
- Click on the product edit section “Pencil icon”
- In “General” settings
- You can select then Upload them.

5.) Product settings:-

5.1) If allow product creation “Yes”

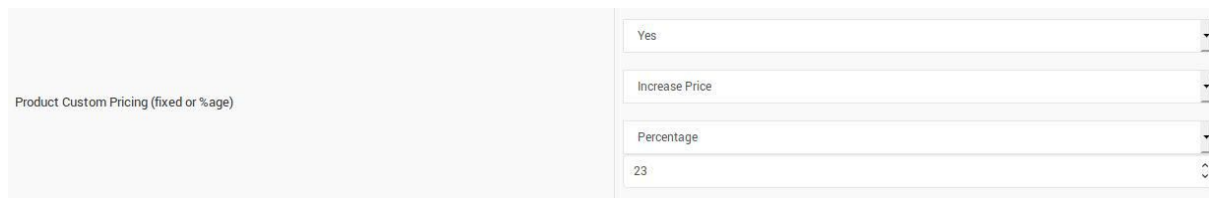

If you create any new product in your Shopify store of same Product type (which are already in the app) then it will automatically created in the app.

The screenshot shows the 'Product Settings' interface. On the left, under 'Product Import Option', the 'Allow Product Create' checkbox is checked and highlighted with a red box. Below it, a small warning icon and text state: 'Set "No" if you don't want to add product in our app.' On the right, under 'Published Product', a dropdown menu is set to 'Yes'.

5.2) Product Customization:-

If you want to increase or decrease the pricing of the product in fixed or percentage form, you can do this from this setting.

The screenshot shows the 'Product Custom Pricing (fixed or %age)' settings. It features three dropdown menus: the first is set to 'Yes', the second to 'Increase Price', and the third to 'Percentage'. Below the third dropdown, a numerical input field is set to '23'.

5.3) You can also set the VAT rate for the products.

5.4) You can also set a discount price with Vat Or with out Vat (fixed or %age) basis.

5.5) You can also set the date of discount on fruugo.

5.6) Fulfillment Lead Time :- You have to enter the number of days that will be required to dispatch a product.

5.7) Threshold Product Inventory :- You have to enter the minimum quantity of a product to avoid overselling.

5.8) You can also set the currency & language of the products.

5.9) If you are manufacturer then it's not mandatory to assign EAN's for the products. Just allow “Yes” from setting.

Hope this information is helpful to you!

Thanks!
