Bonanza-Shopify Integration:

Marketplace integration is the integration of popular, well-established marketplaces that exist already on the net. Using these marketplaces helps to reveal your products to a wider audience because the customer base for them is already wide, as for example Amazon. Amazon is one of the largest sales websites there's and a highly recognized global brand, with an outsized customer base. By integrating Amazon into your site, your products would seem on the positioning and be accessible to a bigger audience because of the number of shoppers Amazon draws in.

Product categories:

- Antiques
- Art
- Baby
- Books
- Crafts
- Health and beauty
- Fashion
- Home garden

- Jewelry
