

Upload products on Bonanza Integration App by Cedcommerce

Uploading products on Bonanza Marketplace through our App is very simple and doesn't require much effort.

After profiling the product, i.e after making a product compatible by modifying its details as per Bonanza marketplace, we are required to upload those products to the Bonanza Marketplace. As that is the main motive behind all of this.

How to upload?:

There are 2 ways to upload products:

- Directly from the upload button after Profiling.
- Click on the Product menu On the top navigation bar:

The menu appears as a dropdown:

- Step 1: Click Manage Products.
- Step 2: Select the products to upload by clicking on the checkboxes
- Step 3: Select Upload Product, and then click the Action.

A success message will appear, However, if there is an error in the product upload then it would also appear on the page. Making it easy for you to rectify it!
